

Are you looking for an opportunity to join a team where your contribution makes a positive impact on the lives and learning of future leaders in Science, Technology, Engineering and Math? STEM Innovation Academy is looking for exceptional professionals to join our team.

About Us

STEM Innovation Academy is a public charter school in Calgary that opened in September 2021. Our junior high school currently serves over 450 students in grades 7-9. In September 2022, our high school campus opened a NW location located in the University Innovation Quarter with 115 Grade 10's. In 2023-24, we will be growing our program to 400 Grade 10's and 11's with a long-term goal of a full high school with over 900 students. With a mission to inspire the next generation to be knowledgeable creators, innovators, and responsible leaders, we believe every student can be successful in STEM and should have the opportunity to learn about cutting-edge science and technology topics.

Position Information

High School STEM Computer Science (CTS) Teacher

Education and Experience

- Valid Alberta Teaching Certificate
- Bachelor of Education Degree or equivalent recognized by Alberta Education

Demonstrated Skills and Competencies

- Collaboratively work with CTS team members and learning leader to support Grade 10 and 11 student learning in our STEM electives program.
- Ability to learn and develop as a professional – willingness to learn
- High level of organization and efficient project management; flexibility and adaptability in managing multiple class projects
- Student centered approach and a willingness to personalize learning to the needs of the student. Provide formative and summative assessment to students on identified learning outcomes throughout the term.
- Foster positive relationships with students to create an atmosphere of trust and encouragement in the classroom

- High school STEM Electives fall into 3 strands: Design and Engineering, Computational Thinking and New Media. This position would fall into the computational thinking strand and will be taught to a senior level, grade 11 and 12.
 - Ability to teach intermediate and advanced CTS credits.
 - Ability to teach Level 3B – [CSTA standards](#)
 - Computational thinking concepts: abstraction, decomposition, pattern recognition, testing and debugging.
 - Incorporate IoT and physical computing (Adafuit circuit playground, Arduino and Raspberry Pi) to enhance student learning
 - Commit to ongoing curriculum enhancements and development
